

Photography club

School photography club was created for the needs of the project run in the program Erasmus+.

The project was attended by 7th and 8th grade students of Primary School.

Classes started with lecturing about the history of photography.

For taking first pictures such old cameras were used.

The words like: snapshot, shutter, shutter speed, focal length, the depth of field and the strengths of photography ceased to be a mystery.

The measurable effects of those classes was a few series of photos which students took after they had learnt important information.

The classes included also the things connected with the build of camera, functioning of its components as well as kinds of lenses and their usage.

The depth of field

The beautiful, golden Polish autumn also become an object of photographies taken by Photography Club members.

We also set off in the Pacanów surrounding area to preserve in the photography the most important and the most beautiful objects in our neighbourhood.

Thanks for watching
